## EXPERIENCE

EPAM NEORIS

Jun. 2026 – Present

Junior Data Engineer

Madrid, Spain

- Joined BBVA's CIB (Corporate & Investment Banking) department as a Junior Data Engineer, ensuring compliance with enterprise-wide quality standards through the definition and implementation of controls and validations across the different data ingestion processes.
- Development and maintenance of data ingestion pipelines in the AWS cloud environment, ensuring the traceability, integrity and regulatory compliance required in the banking sector.
- Collaboration with cross-functional teams within the BBVA CIB project, applying agile methodologies and data engineering best practices in a demanding corporate environment.

EPAM NEORIS

Mar. 2026 – May. 2026

Data Engineering Intern

Madrid, Spain

- Development of visualizations and reports in Power BI for different departments of the company, adapting reports to the needs of each area.
- Learning data modeling techniques applied to the business environment, including schema design and model optimization.
- Specialized training in Microsoft Fabric to support the migration and modernization of the company's data management platform.

NTT DATA

Mar. 2025 – Aug. 2025

Data Engineering Intern

Madrid, Spain

- Collaboration on banking projects for BBVA in the Data & Analytics area: data ingestion, modeling and quality control.
- Use of AWS and internal tools such as Kirbys, Hammurabis to ensure traceability, integrity and regulatory compliance.
- Data automation and analysis with Python, optimizing workflows and processes.
- Intensive initial training in data governance and continuous learning; strengthening competencies in teamwork, communication and problem solving in a corporate environment.

GISAI – UPM

Feb. 2023 – Jul. 2025

Research Associate

Madrid, Spain

- The Advanced Telecommunications Networks and Services Engineering Group is officially recognized by the Technical University of Madrid.
- My participation in the research group mainly involves the development and organization of different projects proposed by the professors who make up the group, in addition to the development of personal projects.

## EDUCATION

Universidad Politecnica de Madrid

2020 - 2024

Bachelor of Science in Software Engineering

Madrid, Spain

- GPA: 7.0/10.0

Universidad Politecnica de Madrid

2020 - 2025

Bachelor of Science in Information Society Technologies

Madrid, Spain

- GPA: 7.4/10.0

Universidad Politecnica de Madrid

2024 - 2025

Master's in Big Data Projects

Madrid, Spain

- GPA: 8.3/10.0

## RELEVANT PROJECTS

---

### Electoral System based on Blockchain Technologies

**Feb. 2024 – Jul. 2024**

*Team Project*

*GitHub, Java, NoSQL*

- Bachelor's thesis based on the planning, design, development and deployment of a fully digitized electoral system using Blockchain technology, in order to digitize the complete process, increase transparency and allow all citizens to participate in the system.
- **Final Grade: 10/10**

### Certification Agency based on Blockchain Technologies

**May. 2025 – Jul. 2025**

*Individual Project*

*GitHub, Go, React Native, NoSQL*

- Bachelor's thesis based on the planning, design, development and deployment of a fully digitized distributed personal certification agency using Blockchain technology, in order to increase transparency, increase user sovereignty and improve trust in institutions.
- **Final Grade: 9.5/10**

### Industrial Real-Time Sensor System

**Feb. 2023 – Feb. 2024**

*Team Project*

*Python, MongoDB*

- GISAI research group project based on the planning, design, development and deployment of a real-time sensor network at industrial level to guarantee the quality of company products.
- Based on the collection of precise data to optimize processes, improve product quality, reduce operating costs and detect irregularities.

### Feasibility Study of an IoT and Big Data System

**May. 2025 – Aug. 2025**

*Individual Project*

*LaTeX*

- Master's thesis based on researching the feasibility of an intelligent sensor system in public transport with preventive violence detection capabilities and predictive optimization.
- To support this research, 69 international studies and successful use cases have been analyzed to evaluate its implementation.
- **Final Grade: 7/10**

## CERTIFICATIONS, SKILLS & INTERESTS

---

### Certifications

Languages    B2 - CEFR Level – TOEIC  
Driving       Spanish Driving License: Type B

### Technical Skills

Databases        MySQL, PostgreSQL, MongoDB, Redis  
Programming    Java, Python, C, SQL, R, Go, React Native  
Tools             GIT, Docker, Kirbys, Hammurabis, Pandas, Boto3, PySpark  
Cloud Computing Google Cloud, Azure, Amazon Web Services  
Networking      Cisco, Juniper, Firewall, VPN, NAT

### Personal Skills

Management    Strategic planning, Leadership, Project management  
Interpersonal   Creativity, Critical thinking, Teamwork, Effective communication  
Development    Adaptability to change, Continuous learning

### Interests

Personal    Travel, economics, reading, technology, history, business, entrepreneurship
